EXPERIENCE

Software Engineer | AirAsia Philippines, Inc.

Philippines Remote Regular Nov 2022 – Present

- Pioneered AI-assisted and vibe coding workflows on the team, accelerating development cycles and elevating code quality.
- Pioneered development of an internal airline system and co-led the development of its pricing module.
- Engineered a data sync service that fetches Workday updates, persists them to a central database, and propagates changes to downstream applications.
- Revamped a Vite module-federated flight scheduling app, integrating 25 report modules each with distinct UI, data sources, and Excel and PDF exports.
- Enhanced seat and baggage recommendation engines on AirAsia Move, implementing sit-together and child-adult pairing logic that drove ancillary sales uplift.
- Shipped a real-time airport operations monitoring application covering all AirAsia airports, enabling flight operations and network teams to surface and escalate live issues faster.
- Developed a Workvivo chatbot with self-service features including ISR creation, password reset, and account unlock, with live agent transfer support.
- Built a C-Level KPI dashboard with 100+ BigQuery queries and LLM-generated insights per chart for executive visibility.
- Delivered a pilot training tracker application for AirAsia with offline-first capabilities, allowing pilots to log and monitor training progress during flights and sync data upon reconnection.
- Created a crew portal for tracking sales, commissions, and flight schedules, with data sourced from BigQuery.
- Developed a recruitment application that pulls job postings from Workday, allows users to create hiring events with shareable applicant form links and custom email templates, and syncs candidate assessments back to Workday.
- Collaborated with Malaysia-based developers on cross-functional projects, including on-site work and training in Kuala Lumpur.

Flutter Developer | Ben Edictio Corp.

Philippines Remote Regular Nov 2021 – Nov 2022

- Assigned to Indra Philippines, Inc. as Flutter Developer; later seconded to AirAsia as Software Engineer and subsequently absorbed.
- Helped develop, debug, test, and maintain applications used by thousands of AirAsia users.

Mobile Developer | Bookdis Technology

Philippines On-site Regular Jun 2020 – Oct 2021

- Led the development of multiple Flutter mobile applications aligned with a food delivery service, including pricing logic and Google Maps integration.
- Built an order monitoring website to track and manage ongoing deliveries in real time.
- Translated UI/UX designs into smooth and user-friendly interfaces across mobile and web.

Freelance Web Developer | Oolong Media & Social Garden

Canada / Australia Remote Freelance Aug 2018 – Feb 2020

- Converted PSD and design mockups into custom WordPress pages and templates for Oolong Media.
- Built responsive Gravity Forms with dynamic fields to capture marketing leads effectively.
- Optimized WordPress sites through image deferring, performance tuning, and page speed testing.
- Maintained WordPress sites by keeping plugins up to date and ensuring overall stability.
- Built Unbounce landing pages for Social Garden's real estate developer clients, showcasing properties and floor plans.
- Built custom dynamic Unbounce forms to capture and convert leads.
